Docent transcript access brief

Research team (simulated)

Docent / transcript access | Preview revision 1

DRAFT - Not reviewed

Review scope

SIM-DOCENT-AI-001 - Analyse agent transcripts to support research and prepare evidence for human review in this simulated case.

Requirement and control

SIM-DOCENT-REQ-002 - internal pilot sharing criterion. SIM-DOCENT-CTRL-002 - Check who can access transcripts. Organization implementation: Not assessed.

Assessment result

Not reviewed.
No rationale recorded.

Evidence and limitations

Planning material is available. Intended audience, actual grants, a performed method/check and retained operating result remain missing.

Follow-up

SIM-DOCENT-ACT-002 - Planned. Retain the proposed audience and a reviewable permission-check method; record unresolved access questions.

Assurance and human decisions

The assurance activity is Planned. No operating result, independent assurance conclusion, risk acceptance or issued Decision is represented.

Framework basis

ISO/IEC 42001:2023; NIST AI RMF 1.0 (2023). ISO/NIST references are contextual examples, not a completed or validated criteria assessment.

Source and version basis

SIM-DOCENT-REC-PLAN-001 - draft 0.2 — example only. Preview source epoch 1. The original case remains incomplete.

Scope and limitations

Illustrative workflow only. This report records the selected in-memory preview snapshot. It is not an issued organizational assessment, operating proof, approval, certification or regulatory conclusion.
