ASSESSMENT / SAVED REVIEW BRIEF

Docent

Transcript access

A focused brief from the saved assessment. Prepared for UX review on 16 October 2026.

Review not performed

Actual access settings, a legitimate method and performed checks are not supplied. No operating conclusion or approval is issued.

AI System ID	SIM-DOCENT-AI-001
Assessment	SIM-DOCENT-REC-ASMT-001
Evidence cutoff	2026-10-14
Assessment date	Not recorded

What needs to happen next

1 Define the intended audience

Identify the pilot collection, proposed recipients and legitimate sharing boundary.

2 Retain the actual access basis

Provide exact configuration/grants and a source that can be reviewed against that audience.

3 Settle and perform a legitimate check

Select the method, retain the performed result and have an eligible person evaluate it.

Report coverage

This brief covers SIM-DOCENT-RVW-002 and SIM-DOCENT-CTRL-002, related evidence gaps and SIM-DOCENT-ACT-002. Other review items, impacts and detailed risks remain in the full assessment; this is not its complete export.

QUESTION AND EVIDENCE

Inspect the basis

The review question

Would the proposed sharing check define the audience and inspect collection grants before sharing synthetic transcripts?

Review item	SIM-DOCENT-RVW-002
Criterion	SIM-DOCENT-CTRL-002 / C2: proposed sharing criterion
Applicability	Under review
Evaluation level	Not recorded

Available context

Public documentation - URLs only

The existing source inventory records a public permissions/sharing description, accessed 14 October 2026. No exact upstream version or original copy is retained.

https://docs.transluce.org/sdk/permissions

Source Record	SIM-DOCENT-REC-PUBLIC-001
Upstream version	Not recorded
Original custody	Missing - links are available, upstream bytes are not retained

Exercise-authored material

The retained draft 0.2 public feature baseline and pilot plan describe a fictional exercise. They are not deployment settings, an approved method or evidence of an access test.

Claim-specific evidence use

The existing public-source Evidence use belongs to the System profile and is Not reviewed, with access Not checked. No completed contextual use against SIM-DOCENT-RVW-002 is supplied. Opening or linking a source does not make it sufficient for the access claim.

ASSESSMENT AND FOLLOW-UP

Keep the outcome honest

Current saved state

Review result	Not reviewed
Control implementation	Not assessed
Review rationale	Not recorded
Reviewer / review date	Not recorded / Not recorded
Assessment conclusion	Not recorded
Issued governing decision	Not recorded

Material uncertainty

No actual collection settings, performed check or completed assessment is supplied.

Related risk scenario

In this hypothetical pilot, a collection containing sensitive transcript content could be shared beyond its intended audience.

Hypothetical exercise scenario; no actual incident, affected person or effectiveness result is asserted.

Planned follow-up

Define the pilot collection audience and prepare a review of its sharing permissions using synthetic data.

Action / status	SIM-DOCENT-ACT-002 / Planned
Recorded owner	Governance lead (sim.) - exercise role only

Blocker: Actual collection settings and performed permission-check evidence are unprovided.

TRACEABILITY AND PUBLICATION

A version you can trace

Exact saved basis

AI System	SIM-DOCENT-AI-001
Assessment / revision	SIM-DOCENT-REC-ASMT-001 / 14
Review / control	SIM-DOCENT-RVW-002 / SIM-DOCENT-CTRL-002
Evidence cutoff	2026-10-14
Report template	OWL-P1-access-brief-1
Publication status	Draft sample - not issued or approved

Sources used in this brief

SIM-DOCENT-REC-PUBLIC-001

Docent public documentation and Transluce background — URLs only | upstream version not recorded | custody: Missing

SIM-DOCENT-REC-BASE-001

Simulated Docent public feature baseline | draft 0.2 — example only | custody: Available

SIM-DOCENT-REC-PLAN-001

Simulated Docent evidence and transcript-sharing pilot plan | draft 0.2 — example only | custody: Available

Snapshot identity

027b8115da6bea3959a56bacecf67e6273e489e019f72bb9660849dfc0ba9e44

SHA-256 identifies the selected fictional input snapshot. It does not prove source truth, evidence sufficiency or approval. The generated PDF has its own digest in the sample build receipt.

Change and distribution

Make corrections inside OWL, save a new revision and generate a new PDF. This report stays attached to its original basis. Changes to an external PDF copy do not update OWL. Original evidence and recovery packages keep their separate formats.
